

# 200GCE Certification for Air-Cooled Switches in Oil and Petrochemical Industries

This International Standard gives requirements and recommendations for the design, materials, fabrication, inspection, testing and preparation for shipment of air-cooled heat exchangers for use in ...

Let's discuss the construction and standards for air-cooled heat exchangers before you place your order.

This standard gives requirements and recommendations for the design, materials, fabrication, inspection, testing, and preparation for shipment of air-cooled heat exchangers for use in the ...

Petroleum, Petrochemical, and Natural Gas Industries Air-cooled Heat Exchangers Petroleum, Petrochemical, and Natural Gas Industries--Air-cooled Heat Exchangers

The purpose of this quality requirements specification (QRS) is to define quality management requirements for the supply of air-cooled heat exchangers in accordance with API Standard 661 for ...

ISO 13706:2011 gives requirements and recommendations for the design, materials, fabrication, inspection, testing and preparation for shipment of air-cooled heat exchangers for use in the ...

API Standard 661 for air-cooled heat exchangers in petroleum, petrochemical, and natural gas industries. Covers design, materials, fabrication, and testing.

The latest, up-to-date edition. This standard gives requirements and recommendations for the design, materials, fabrication, inspection, testing, and preparation for shipment of air-cooled heat ...

Discover how API standards support safety, innovation, and global recognition in oil and gas. Explore standards and get involved in their development today.
