

Cold-rolled and hot-dip galvanized cable trays

Leading manufacturers of Hot Dip Galvanized (HDG) cable trays. Our trays offer superior zinc coating for maximum rust protection in outdoor and industrial areas.

SILTEC cable trays, heavy duty type, feature a reinforced construction with zigzag wires down the sides and double wires on the sides and at the bottom, providing these trays with a very high load capacity.

Cable tray length is selected based on the load to be supported, the distance between the supports (also referred to as the span), and handling and installation constraints.

Our galvanized cable trays are constructed using high-quality steel plates (cold-rolled or hot-rolled) that undergo meticulous processing and advanced hot-dip galvanizing treatment.

Hardware shall be zinc plated in accordance with ASTM B633 SC1 for pre-galvanized cable trays, or Chromium Zinc in accordance with ASTM F-1136-88 for hot dip galvanized cable trays.

Heavy duty cable trays and cable ladders are manufactured from pre-galvanized or hot-dipped galvanized sheet metal, designed to meet ideal environmental working conditions for indoor and ...

Two hot dip galvanized steel C-Channel profile side rails with transverse ladder rungs; provides the most rigid ladder tray system. Ideal for high vibration environments. C-Channel Swage Ladder trays are ...
