

# Concrete Trench for Optical Cable Protection

The Plastibeton® cable trench is a trusted system by power, utility, railroad and transit companies throughout North America to contain, protect and allow easy access to power, control, signal, ...

Trenwa is the original manufacturer of precast concrete trench and offers the broadest line of proven trench systems. Trusted by Industry Leaders: Trenwa has been a go-to partner for North American ...

Precast Concrete Trench for underground utility purposes. Primarily used for enclosure of electrical, communication, power cables, and piping protection.

Waskey precast cable trench systems provide durable, safe, and easy-to-install solutions for managing underground cables efficiently.

The process usually begins with digging a trench to bury the conduit which is generally PVC plastic pipe, sometimes with pre-installed innerduct (also called duct liner) with a pulling tape to facilitate the ...

Made of a unique, patented High-Density Polymer Concrete, the cable trench system offers flexibility and strength, as well as exceptional resistance to freeze/thaw conditions. The Plastibeton® Channel ...

Fibrelite covers weigh a fraction of concrete or metal alternatives and offer load ratings up to F900. This means all trench covers can be safely manually removed by two people, no matter what the load rating.

Manufactured from reinforced precast concrete, cable troughs are a great alternative to traditional methods of simply burying service lines as they allow quick access for maintenance and security.

Proper construction of the cable trench provides protection and support for fiber optic network infrastructure.

Engineered precast trench is used in the power, utility, and transportation industries and can also be used in conjunction with catch basins, inlets, and piping for storm water management systems.
