

This article aims to provide a concise yet comprehensive overview of how industrial switches contribute to the formation of industrial ring networks, catering to both traditional industry ...

This industrial ring network switch is equipped with 2 gigabit SC optical fiber interfaces and 4 gigabit Ethernet electrical ports. It supports plug-and-play functionality and has ring network capabilities.

This solution builds a basic two-layer network architecture designed to decrease complexity, enhance security, and increase efficiency and operating uptime for your industrial network.

Originally developed by the Telecom industry for Metro-Ethernet topologies, today, ERPS is primarily used in industrial networks to create fault-tolerant networks.

Discover why industrial ring network switches are essential for the industrial field, ensuring reliability, redundancy, and seamless communication in your operations

Case Communications X-Ring provides an Ethernet Ring between Industrial Ethernet switches, running at 10 Mbps, 100 Mbps or 1 Gbps.

Whether in factory automation, energy management, or traffic control systems, the Ring Network Switch provides stable and efficient communication support, serving as a cornerstone of industrial ...

Cyber-Ring self-healing Ethernet technology is a proprietary developed by ICP DAS that can be used to help establish industrial-grade Ethernet with high reliability and fault-tolerance capabilities, and can ...

The Ethernet Ring Protection Switching (ERPS) protocol is a powerful technology and service that can be used on industrial switches to ensure high network availability and prevent network downtime.

The Jet Ring, Xpress Ring and ERPSv2 Ring make it possible to create redundant network structures to guarantee secure communication, even if connections are faulty.

Cyber-Ring self-healing Ethernet technology is a proprietary developed by ICP DAS that can be used to help establish industrial-grade Ethernet with high reliability ...

Congo Industrial Ring Network Switch
