

# Core Switch 512Mbps

ECS5500-12P L2+/Lite L3 10G Multi-Gigabit Ethernet Switch The Edgecore ECS5500-12P switch is a 10G Ethernet access switch with 8 x 10GBASE-T ports and 2 x 10G SFP+/2 x 10GBASE-T as uplink ...

From small business networks to enterprise-level infrastructures, our managed switches deliver seamless scalability with high-speed connectivity and robust port options.

10G SFP+ ports provide flexible fiber connectivity options for core switch uplinks with backward compatibility to Gigabit fiber networks.

Powerful new modular smart switches for the core of the network, purpose-built to power, secure, and simplify the network for AI.

What is a Core Switch? A core switch is the primary switch installed at the backbone of a layered or hierarchical network. These data switches are responsible for routing and data switching at the core ...

This data sheet describes the benefits, specifications, and ordering information for the Cisco Catalyst 2960-X Series Switches.

At the heart of this activity lies the core switch, a critical component responsible for facilitating high-speed data transmission and maintaining the overall stability and performance of the ...

What is a Core Switch? It is a powerful backbone switch in the center of the network core layer, which centralizes multiple aggregation switches to the core and implements LAN routing. The ...

L3 managed Ethernet core routing switch with 6\*1/10G uplink SFP+ fiber ports and 48\*100/1000M SFP ports. Built-in 75W power supply and supports 1U/19" cabinet installation.

The switch is ideal for SMB networks as a core switch. This switch is also positioned as cloud-edge access switch to connect IOTs and other devices in Enterprises and SMB deployments.
