

Does the router not have an optical fiber cable port

Because you don't have fiber cables run throughout your house, and you likely don't have a fiber port on your PC. There is no point in the fiber going beyond your ONT.

Fiber internet does not use a traditional cable modem. Instead, it requires an Optical Network Terminal (ONT) -- a device supplied by your fiber ...

Instead of a modem, fiber connections require an Optical Network Terminal (ONT), a device that converts fiber signals into an Ethernet connection. Most fiber ISPs, including Mercury, ...

An ONT has a fiber optic port for the incoming line from the ISP and typically one or more Ethernet ports for output. A router receives its internet connection via an Ethernet port (from the ONT) and provides ...

In contrast to the modem situation, any router can work with a fiber connection. That's no exaggeration, either--if it has an Ethernet port (and nearly every modern router does), you can ...

Fiber internet does not use a traditional cable modem. Instead, it requires an Optical Network Terminal (ONT) -- a device supplied by your fiber provider that converts the light-based ...

The fiber optic cable does not plug directly into a standard home router because the signal type must be translated. The fiber line terminates at the Optical Network Terminal (ONT), ...

Any standard router, including the primary unit of a mesh Wi-Fi system, will work at its full potential with any standard Internet broadband terminal device --modem, Fiber-optic ONT, or others. ...

A fiber wireless router is unnecessary for fiber Internet, but a traditional router will need an adapter to connect the optical network terminal to an Ethernet cable.

No, you typically cannot plug a raw fiber optic cable directly into a standard wireless router. Most consumer-grade routers do not have a built-in fiber port (SFP module or optical interface).

Your router or modem does not directly connect to the fiber optic cable, but rather, it connects to an Optical Network Terminal (ONT) that converts the fiber optic signals into Ethernet.
