

# Fiber Optic Anti-Sketch Device

The anti-rotational device provides a means of stringing fiber optic cable without introducing torsion stress. This unique concept prevents the cable from twisting as it travels over the pulling blocks.

With the ACP-24 you can automate fiber stub removal, polishing times, pressure and motor speeds for each step. Complete polishing procedures are stored inside of the ACP-24 to save time and ensure ...

The Slingco Anti-Rotational Device prevents the cable from twisting as it travels over pulling blocks. Left uncontrolled, the optical cable's delicate glass fibers could be permanently damaged during installation.

Visual end face inspection occurs between each polishing step of a fiber optic cable manufacturing process. With a 450 nm LED to illuminate the fiber end face, the VSD500 system provides clear ...

ECI offers a complete collection of high performance thin film designs that can be deposited directly onto temperature sensitive fiber optic devices at temperatures below 50 degrees C.

The Slingco Anti-Rotational Device prevents the cable from twisting ...

Fiber strippers are precision tools that reliably and cleanly remove a defined length of coating (often 30-40 mm) from a fiber end so that the bare glass is exposed without scratching or nicking it.

3SAE Technologies' fiber preparation equipment presents a versatile solution that is compatible with fiber holders from a broad range of commercially available fusion splicing systems.

Aspects and techniques of the present disclosure relate to fiber optic connectors with features that help eliminate the potential of a capillary effect or epoxy wicking.

The device prevents the cable from twisting as it travels over pulling blocks. Left uncontrolled, the optical cable's delicate glass fibers could be permanently damaged during installation.

It ensures precise epoxy application by automatically adjusting for syringe size, fluid volume, delivery speed, and post-dispense reverse motion, providing exact replication with every use.
