

Fiber optic spectroscopy analyzer with anti-tracking technology shipped worldwide

In this work, a Raman spectroscopy gas detection system based on hollow-core anti-resonant fiber (HC-ARF) was developed, along with a multi-stage spatial filtering strategy tailored for ...

FI-FO Portable Raman Analyzer is a high performance Raman Spectrometer suitable for portable transportation can be applied to on-site rapid inspection and laboratory research.

ABB's FTPA2000-260 is a multi-point, FT-NIR analyzer designed for remote, real-time monitoring of continuous and batch processes. Profitability, quality and reliability are some of the challenges the ...

Art Fiber Systems develops in-line fiber-optic spectroscopy systems for real-time process monitoring. From UV-Vis to mid-IR, our custom probes deliver fast, accurate insights.

High-performance spectrometers for online process monitoring and optimization. FT-IR, FT-NIR, and Raman spectrometers all powerful solutions for process environments, which take advantage of fiber ...

The MarqMetrix Fiber BallProbe is the link between any Raman analytical system and your sample. The MarqMetrix Fiber BallProbe consists of two parts: the fiber head and the BallProbe. Convenience of ...

As a leading provider of spectroscopic technology, Jinsp offers more than 20 independently developed spectroscopic products, covering fields such as pharmaceutical and chemical industries, public ...

Optimize your QC testing while remotely monitoring the process using fiber optic simultaneous multiplexing technology and integrated communication for real-time feedback with the Thermo ...

Fiber optic spectroscopy, inline Raman probes, fiber Bragg grating (FBG) sensors, optical temperature and pressure measurements. These components are specifically optimized for PAT applications and ...

In this paper, the sensor was tested for detection of Salmonella and E. coli O157: H7 simultaneously, making it a highly effective diagnostic tool for poultry processing plant applications.

Fiber optic spectroscopy analyzer with anti-tracking technology shipped worldwide
