

Fiber-to-electrical Layer 2 Switch

Discover fiber switches designed for reliable network connectivity. Browse 10G, 2.5G, and gigabit options to expand your bandwidth.

It comes with 8 copper cable transmission ports and 2 ports for multimode fiber optic. It provides simple and complex connectivity for multiple Ethernet device, network management, enhanced cyber ...

Our layer 2 fiber switches and aggregation devices are managed and can be remotely provisioned from our EMS system, allowing for fast deployment and instant connection to your IoT devices.

We offer solutions that provide seamless transmission and conversion from Ethernet media to multimode or singlemode fiber. Our Ethernet network switches with fiber ports comes in managed or ...

Ethernet Switches with fiber uplink ports or all fiber switches, commercial grade, managed and unmanaged and PoE enabled are all available in this section.

The Fiber Ethernet Switch plays an integral part in most modern Ethernet local area networks (LANs). Mid-to-large sized LANs contain a number of linked switches.

Managed and unmanaged Layer 2 and Layer 3 fiber optic Ethernet switches. With 10G SFP+ fiber optic transceiver modules, they meet your highest bandwidth demand.

Layer 2 Fiber Switches are perfectly suitable for FTTx Ethernet based deployments providing features like VLAN (port based and IEEE 802.1q based), traffic priority, bandwidth limiting ingress/egress, ...

As opposed to traditional copper Ethernet switches, which use electrical signals for managing traffic flows, fiber optic network switches utilize light pulses instead for data transfers at ...

The high fiber port count makes this a great switch for aggregating remote locations to one central location. The switch operates at Layer 2 and offers a web-based management interface as well as ...
