

Fiji CE Certified Coherent Optical Module DML

NEC has been developing and manufacturing optical transceivers for more than 30 years since the dawn of the optical communications era. Based on this extensive experience, we provide high-reliability ...

Designed to transmit and receive data in both directions on a single fiber for 100G and beyond. Provides an operationally efficient and cost-effective way for telecommunications and cable operators to ...

Featuring a single +12V DC power supply and a SMA RF input connector, this module is easy to operate and integrate. The module can be controlled remotely via the RS485 interface. Wavelength other ...

Featuring a single +12V DC power supply and a SMA RF input connector, this ...

The package contains a high-speed DFB laser chip, thermoelectric cooler, thermistor, optical isolator, and a rear-facet monitor photodiode for external optical power control.

How Coherent is powering innovation in artificial intelligence and machine learning for next-generation datacenters. Get the pluggable module performance you need from the manufacturer of choice for all ...

These modules put the DSP on the module and use a conventional retimed digital interface. These modules can use the same optical modulation techniques as the ACO interfaces do. Many different ...

VISIQ is designed to make coherent signal analysis and DSP optimization as simple as possible. It features an intuitive user-interface that reduces the learning curve for new users, while still providing ...

Marvell paves the way deploying merchant Digital Signal Processor (DSP) technology into low-power, high-density QSFP-DD, OSFP and CFP2-DCO coherent pluggable modules for cloud and telecom ...

In this white paper we explore how the DWDM functions, parameters, and operational aspects of "smart" optical pluggable modules can be handled more efficiently in order to deal with the ...
