

Fire protection design for micro-module cabinets

Our approach delivers fast, flexible, and fully compliant fire protection solutions designed to safeguard your data, assets, and continuous operations--wherever modular infrastructure is deployed.

By carefully working through this checklist, you'll be well-equipped to make an informed decision and select a micro fire suppression system that provides robust, reliable, and appropriate ...

Essential design principles and fire-safety strategies for battery module cabinets, including materials, ventilation, detection, standards, and emergency planning.

Learn what a micro fire suppression system is, how it works, and why it protects electrical cabinets, enclosures, and critical equipment from fire damage.

Fire suppression systems are designed specifically for cabinets or enclosures, there are specialized solutions tailored for protecting smaller enclosed spaces like electrical cabinets, server racks, control ...

To mitigate these risks, it is vital that electrical cabinets are properly designed, installed, and maintained to control current flow safely. Additionally, suitable fire suppression systems must be in place to ...

Find out how our in-cabinet automatic Stat-X fire suppression is ideal for individual electric cabinets, control panels, and/or cable trays.

The sudden tube depressurization actuates the special pressure differential valve and instantly floods the entire cabinet area with CO₂ or FM-200 extinguishing agent. The fire is quickly suppressed just ...

Compact, heat-triggered protection for micro-spaces. Engineered for electrical cabinets and engines. Activates at 170°F. Discharges in ≤6s. No piping needed. ...

Compact, heat-triggered protection for micro-spaces. Engineered for electrical cabinets and engines. Activates at 170°F. Discharges in ≤6s. No piping needed. Traditional fire suppression is too bulky for ...

Explore a powerful range of fire panels and detectors designed to adapt to the evolving safety needs of modern buildings -- from compact deployments to large-scale enterprise installations.
