

# Flame-retardant network cable optical cable models

This FireTuf fibre range is fully compliant with fire resistant standards IEC 60331-25 and flame retardant standards IEC 60332-2-3-24C, guaranteeing the cables circuit integrity and performance in the event ...

CPR fire-resistant optical cables with Euroclass Dca, Cca, and B2ca classifications. Safety and performance for critical applications.

This innovative cable features a patented design that ensures functionality for over three hours in temperatures reaching 1000°C. It is halogen-free and flame-retardant, providing protection against ...

Compare FS OFNR and LSZH fiber optic cables to find the best fit for your installation. Learn how their flame-retardant jackets enhance safety, reduce fire risks and protect your cabling ...

In this guide, we list the Top 5 Global Manufacturers who set the standard for fire safety. We will also clarify the confusing jargon (OFNR vs. OFNP vs. IEC 60331) and show you how to source safety ...

Available in both multimode (OM3/OM4) and singlemode (OS2) variants, they support configurations from 4 to 24 cores in a durable central loose tube design. Meeting stringent international standards, ...

For fire-critical areas, choose fire-resistant, LSZH fiber optic cables that are certified (e.g., FE180 and CPR B2ca) to maintain transmission and minimise smoke/toxic gases during a fire.

CommScope designs and manufactures a comprehensive line of fiber optic cables--from outside plant to indoor/outdoor and fire-rated indoor fiber cables.

These indoor fiber optic cables are used exclusively within buildings and must have a flame-retardant cable jacket to fit this purpose. Flame resistant cable may be deployed in-duct (conduit) or cable tray.

We carry RHW-2 and RW90-Two-Hour Fire cables as well as Two-Hour Horizontal and One-Hour Vertical Cables. We also carry QFCI Fire Resistant Fiber Optic Cables for communications.
