

Handheld Fiber Channel Tester

Ruggedized, field-ready and traceable fiber optic testers for use in defense applications and harsh environments. Simple, cost effective PON / GPON / XGPON testers for last mile passive optical ...

It integrates all the essential fiber test requirements into a single device with OTDR measurement, fiber end face analysis, optical loss testing and visual fault locator.

Buy full line of basic fiber testing equipment,like visual fault locator,laser module,power meter& light source from FS.Highly reliable,rugged,flexible,accurate and designed for test productivity.

The EXFO MaxTester 720D-SM1 is a compact, high-performance handheld OTDR built for access network testing, central office verification, and troubleshooting of live or dark fibers.

Portable fiber optic tester for power, fault, and performance analysis for network maintenance.

The industry's smallest handheld instrument can test throughout the service life cycle, including fiber characterization, service activation, troubleshooting, and maintenance.

EXFO's 64G Fibre Channel test solution helps test engineers in the lab ensure that new switches and transceivers are up and running reliably. When paired with the latest FTB-1 Pro platform, it's the ...

Whether you're seeking Power Meters, Loss Testing Inspection tools, or comprehensive Fiber Optic Test Kits, we have a solution for every application. Explore our range and equip yourself with the precise ...

AIT is proud to announce the release of its latest innovation: a compact, portable Fibre Channel test and simulation device for USB or Ethernet, available now for purchase and demonstration.
