

Roblon Precision Coiling Unit (PCU) eliminates the need for manual guiding of the cable in the take-up process. The cable is positioned perfectly side by side without major gaps or cable crossings, ...

With precision coil metrology, comes the ability to measure and spool fiber and cable in general, a capability that supports all of Berkshire's fiber and cable products.

Take a look at our high-precision automatic optical fiber winding machine in actual production work.

For fast and precise rewinding of fiber optic cables or optical fibers, our high-speed rewinding machines offer the ideal solution. With winding speeds of up to 1000 m/min, the machine rewinds fiber, wire, ...

The advantages of automated winding systems for optical fiber handling are significant, especially when considering the delicate nature and high precision requirements of optical fibers.

Fiber-Line™ Precision Winding of fiber in a given volume. Precision wound packages are critical for processing Fiber-Line™ engineered fibers. The optimized process provides solid package stability ...

Developed for the fast and accurate rewinding of optical fibers, fiber optic cables and delicate filaments, these systems achieve winding speeds of up to 1000 m/min, all while ensuring exceptional tension ...

Newton developed a camera, custom lens and illuminator system on a high-speed, three-axis motion stage to control complex windings of optical fiber coils.

Explore advanced fiber optic winding machines, engineered for unmatched precision and efficiency in modern production. From high-precision models like FRM-WR-001 to efficient solutions such as ...

Wire and cable auxiliary equipment, support OEM and ODM. 2) Wire ends must be visible and secure at both ends. Q1: Are you a factory or trading company? We are a factory. We can promise you a short ...

High-precision optical cable winding tube
