

Co-packaged optics (CPO) is a disruptive approach to increasing the interconnecting bandwidth density and energy efficiency by dramatically shortening the electrical link length through...

Solutions for Next-generation CPO Advanced packaging with direct bonding instead of micro-bumps  
Electronic-photonics Co-design (e.g., Optical DAC)

Discover what Co-Packaged Optics (CPO) is, its architecture, benefits, challenges, and future trends in AI-driven data centers and high-speed networks.

Enabling the future through light: Excelitas, an Indonesian photonics brand, shares how small businesses can power up logistics to grow opportunities cross-border.

The primary driving force behind Indonesia Silicon Photonics Market growth is its ability to reduce costs associated with optical communication networks while providing efficient bandwidth capabilities.

One of the initiatives pursued by them is co-packaged optics, a promising technology that has lots of advantages over optical transceivers, including better thermal management, power consumption, ...

CPO solutions by ASMPT enable high-speed data and energy-efficient Co-Packaged Optics packages--optimize electronics and photonics integration now.

Our customers are building 2.5D heterogeneous, integrated, co-packaged devices using chips connected to the package through fine-pitch copper pillars. I think it'll eventually move to 3D, or ...

With continued investment in photonics innovation and infrastructure in Indonesia, this market is expected to grow significantly, placing Indonesia at the forefront of next-generation technologies in ...

US-based logistics company DHL published a December 2025 assessment of Indonesia's semiconductor industry that noted growing demand for optoelectronic components, including LEDs ...

Our customers are building 2.5D heterogeneous, integrated, co-packaged devices using chips connected to the package through fine-pitch ...

# Indonesia Co-packages 2 5G Photonics
