

The KDJB-1200Y is a high-performance, six-phase relay protection tester engineered for comprehensive validation of modern protective relays and automation systems.

The secondary defect elimination tester HZJB-1700 is controlled by single chip microcomputer, which is simple in function and convenient to carry. It can be ...

It has the performance and function of a large tester, and has the advantages of small, flexible, easy to operate, high reliability, and high performance-price ratio. It is a permanent tool for health care workers.

The correct operation of the microcomputer relay protection tester is the key to ensuring testing accuracy. Here are some key steps and precautions to help you operate the microcomputer ...

This model relay test equipment can independently finish device test in professional fields of microcomputer protection, relay protection, excitation, metering, fault recording, etc.

The secondary defect elimination tester HZJB-1700 is controlled by single chip microcomputer, which is simple in function and convenient to carry. It can be used to test the action value and time of AC relay.

Test-330 three phase microcomputer protection relay test equipment is the highly efficient relay tester of our company.

For testing high-voltage microcomputer protection devices, it is recommended to use a microcomputer relay protection tester capable of simultaneously outputting three-phase voltage and three-phase ...

It can simulate various operating conditions of the power system, such as normal operation, short circuit, overload, etc., and then send signals to the tested relay protection device and ...

It can test not only various traditional relays and protection devices, but also various modern microcomputer protections, especially for transformer differential protection and standby automatic ...

The microcomputer relay protection tester can manually or automatically test various types of voltage, current, frequency, power, impedance, harmonics, differential, synchronous relays, etc.

# Kyrgyzstan Microcomputer Protection Tester

Relay
