

It has become de facto the leading and largest laser laboratory in Latvia, with its researchers actively working in the areas of atomic, molecular, and chemical physics, astrophysics, as well as various ...

Historical Data and Forecast of Latvia Laser Processing Tools Market Revenues & Volume By Diode Laser for the Period 2021-2031 Historical Data and Forecast of Latvia Laser Processing Tools Market ...

Experiments are conducted in alkali atomic vapours using a wide range of lasers and signals are modelled using the optical Bloch equations for the density matrix. Applications to measuring electric ...

In magnetic field measurement devices, with a wide range of applications, including space missions. Research in the Laser Centre is structured topically in its four laboratories: Laboratory of ...

Optical Solutions Latvia Ltd. specializes in infrared optical components and optical assemblies, located in middle of Europe, in Riga, Latvia. OSL has 26 skilled employees, which include 6 dedicated ...

Historical Data and Forecast of Latvia Laser Diode Market Revenues & Volume By Vertical External Cavity Surface Emitting Laser (VECSEL) Diodes for the Period 2020-2030

In 1986, the first picosecond YAG:Nd³⁺ laser with active mode locking was built in the Institute of Solid State Physics, Latvian State University by Guntis Liberts and Vismants Zauls. The first laser shows ...

The Laser Centre (LC) is the largest laser laboratory in Latvia. Its researchers work in the areas of atomic, molecular, and chemical physics, astrophysics, as well as applications of laser techniques.

Latvian Laser Diode Processing
