

ST's portfolio of interfaces includes standard interfaces (such as RS-232, RS-422, RS-423, RS-485, LVDS, and USB), I/O expanders, level translators, application-specific interfaces for smart cards and ...

Figure 1.3 illustrates the transmission of a light ray in an optical fiber via a series of total internal reflections at the interface of the silica core and the slightly lower refractive index silica cladding.

Fiber Optical Light Source - Dual Wavelength 1310nm/1550nm, Single Mode, SC/FC/ST Universal Interface with RJ45 Power & Test Cable, Fiber Optic Cable Tester Add to cart Fiber Optic Light ...

Many different protocol standards such as RC5, RC5x, RC6,... exist for transmitting commands via an infrared wireless interface. This application note describes the widely-used RC5 coding scheme from ...

Lutron's GRAFIK Eye's Interface Module any Lutron GRAFIK Eye lighting system. The ST-LT negates the need to install the manufacturer's GRX-AV or GRX-RS232 interface, providing bidirectional ...

An infrared interface (IRTIM) for remote control is available on STM32F0xx, STM32F3xx and STM32L4xx devices. It can be used with an IR LED to perform remote control functionality.

Future ST-LT production models shall permit an interface with the Lutron Homeworks System. If the ST-LT is part of the CRESNET II System, use of the supplied power pack is optional. The ST-LT is ...

Use powerful ray tracing software to design, optimize, simulate, and fabricate reliable imaging optics. Model, simulate, and visualize illumination optics in a complete design environment.

LightTools Core Module provides graphical 3D solid modeling functionality and interactive optical ray tracing for creating and visualizing optical and opto-mechanical systems.

The ST-LT is a Cresnet expansion module that provides a direct interface to any Lutron GRAFIK Eye lighting system. The ST-LT negates the need to install the manufacturer's GRX-AV or GRX-RS232 ...

Light ray ST interface
