

Test equipment for relays, relays boards that provide a verification testing of the performance for electromechanical relays, electronic relays and protection relays in its operating facilities.

We ensure relays work together properly in a protection system--for example, making sure downstream relays use time-delayed tripping to avoid unnecessary power outages.

Sophisticated test hardware and software solutions to analyse the entire protection system performance. Compact, high-power relay test systems with IEC 61850 protection test capabilities and advanced ...

Maintenance, testing, measurement and operation of electricity network relay protection, automation, RTU, control systems. Design and assembling of relay protection cabinets, automation cabinets, ...

Finder is one of the relay manufacturers with the highest number of approvals and certifications worldwide. This guarantees a high degree of reliability in all types of applications.

o Siemens SIPROTEC, ABB, Hitachi, Schneider, SEL relays programming, testing and commissioning o IEC61850, Modbus protocols configuring, testing and commissioning

The enterprise was established directly for this purpose in 2004 and from the very beginning AEDILIS has attracted professionals with immense experience in design, mounting, installing, ...

We have dedicated team of experts for Testing & Commissioning services of all types of Protection Relays, Control & Relay Panels, Switchgear Panels, Transformers, Motors and Sub-stations up to ...

Relay Testing & Commissioning Services Relay Testing & Commissioning Services We do programming, testing and commissioning of all relays irrespective of its make with all applications. ...

Our protection testing solutions help you to master the challenges involved in testing protection relays and other assets, as well as creating the associated test reports, in the best possible way.
