

The CC-PII448L-xD 80km SFP+ Transceiver bridges the gap between high-speed performance and long-distance requirements. By integrating cutting-edge optical components, ...

Buy 1550nm SFP transceiver modules for long-distance fiber networks. Compare types, distances, compatibility, and pricing to choose the right SFP.

The 10G SFP+ ER module is a small transceiver that converts electrical signals into optical pulses and back, allowing for high-speed communications over long distances.

The LINK-PP LS-SM3110-10C 10G SFP+ LR 10km optical module represents a perfect blend of performance, reliability, and value for demanding network applications requiring high-speed ...

ETU-Link 100G BIDI 80KM optical module provides a new solution for long-distance high-speed data transmission with excellent performance, high reliability and low power consumption.

The StarryLink optical module is a core component developed by Huawei for data center networks. It delivers ultra-long-distance transmission, exceptional reliability, and enhanced security, ...

The QSFP28 LR4 is a hot-pluggable, four-channel, and full-duplex optical transceiver module designed for long-distance transmission up to 10 km in the 100G Ethernet network with a ...

The LINK-PP LS-SM3110-10C 10G SFP+ LR 10km optical module represents a perfect blend of performance, reliability, and value for demanding ...

Today ETU-LINK will take you through the differences between long-distance optical modules and short-distance optical modules.

Discover everything you need to know about SFP optical transceiver modules for long-distance fiber transmission. Compare LX, EX, ZX models and choose the right module for your ...

100G BIDI 80KM optical module delivers cost-effective long-distance transmission for DCI, 5G, and backbone networks with high reliability.

Long-distance optical link module
