

Mgts Smart Building Flame-Retardant Optical Cable

The PSP is longitudinally applied over the cable core, which is filled with the filling compound to protect it from water ingress. The cable is completed with a flame-retardant sheath.

The MGTS mining optical cable is designed with single-mode or multi-mode fibers housed in loose tubes made of high-modulus plastic, filled with water-blocking gel.

Israel's intensified military operations continue to threaten an already weakened health system, amidst worsening mass population displacement and acute shortages of food, water, ...

The World Health Organization (WHO) condemns the reported killing of more than 460 patients and their companions, as well as the abduction of six health workers, on 28 October from ...

The GYTZS flame-retardant optical cable is designed for high-reliability outdoor deployments in fire-risk environments. Its construction begins with color-coded optical fibers housed in high-modulus, ...

This cable features a single jacket and single armor for enhanced protection, making it ideal for use in harsh environments, including mining and industrial applications. Buy directly for high-quality, cost ...

Timely care and rapid transport save lives, reduce disability and improve long term outcomes. Prehospital emergency care is a key component of the health care system. Strengthening ...

Indira Gandhi Memorial Hospital (IGMH) is a publicly funded hospital in the capital of Maldives, Maldives and is the largest healthcare facility in country. Its primary function is to provide high quality ...

Viet Nam's hospital system consists of a public-private mix, in which the public hospitals play substantial roles in providing health care services to the people. Overall, public hospitals are key ...

MGTS-50~60Xn Optic Cable is Stranded Loose Tube Mining Flame-retardant Cable. The structure of MGTS optical cable consists of a 250µm optical fiber encased in a loose tube made of high modulus ...

An average university hospital generates 1,634 tons of health care waste each year and this number is increasing 2-3% per year (especially since COVID-19); wealthier countries generate more waste.

Explosion-proof performance: Uses spark-free materials and a fully enclosed structure to prevent electric sparks from causing explosions; the sheath is added with flame retardant and treated with anti-static ...

Mgts Smart Building Flame-Retardant Optical Cable

Tubes (and fillers) are stranded around the strength member into a compact and circular cable core. The PSP is longitudinally applied over the cable core, which is filled with the filling compound to protect it ...

WHO fact sheet on patient safety, including key facts, common sources of patient harm, factors leading to patient harm, system approach to patient safety, and WHO response.

This second global report on IPC provides updated evidence on the harm caused to patients and health workers by HAIs and AMR, and presents an updated global analysis of the ...

Compilation of the facts, evidence, numbers, examples, and stats to be used to raise awareness about hand hygiene in messages and presentations.
