Small form factor (SFF) optical transceivers designed for multimode fiber featuring either LC duplex or MT-RJ connector. Select up to four products for detailed comparison.

Small Form Factor (SFF) connectors are compact fiber optic connectors that are designed for small spaces. These types of small components are always beneficial in fiber network applications where space is a ...

This compact, solderable SFF module is ideal for bidirectional fiber applications, transmitting and receiving signals on a single fiber strand for cost-effective fiber to the home (FTTH) ...

Small form factor (SFF) optical transceivers designed for multimode fiber featuring either LC duplex or MT-RJ connector. Select up to four products for detailed comparison.

It provides the SC optical receptacle that is compatible with the industry standard SC connector. Both the transmitter and the receiver are packaged together with a top plastic cover and bottom shield.

This guide explains what an SFF transceiver is, how it works, the key technical specifications, common types, and where these optical modules are still used in today's fiber optic networks.
