

SFP transceivers are valued for their flexibility, low power consumption and ability to support both single-mode and multimode fiber, making them ideal for short-range and long-haul optical transport.

The GLC-SX-MM-RGD is a ruggedized 1000BASE-SX SFP (Small Form-Factor Pluggable) transceiver module designed for harsh industrial environments.

The SFP-L80D-Cxx-RGD optical transceiver is fully compliant with the SFP Multi-Source Agreement (MSA). It meets the requirements of IEEE 802.3 Gigabit Ethernet standard and ANSI Fibre Channel ...

GLC-LH-SMD, GLC-LH-SM, SFP-GE-L, and GLC-LX-SM-RGD are major types of 1000BASE-LX SFP transceiver. Since they have similar specifications, many end users may be ...

This data sheet describes the benefits, specifications, and ordering information for the Cisco SFP Modules for Gigabit Ethernet Applications.

RGD means rugged optical modules, so the optical module with RGD function is an enhanced module. This optical module is more durable and can be used in very harsh conditions. The rugged optical ...

Check Cisco GLC-LX-SM-RGD Compatible 1000BASE-LX/LH Single Mode SFP transceiver module data sheet (SMF/MMF, 1310nm, 550m/10km, LC connector) & price list on FS , buy now!

DDM, DOM, and RGD are common in SFP transceiver names, which make users confused. In fact, DDM (Digital Diagnostics Monitoring) is a technology that enables users to monitor ...

Optical Module RGD
