

# STM-1 optical communication equipment

As a standard and compact SDH TDM device, the STM-1 multiplexer is best suited to applications where high-density E1 ports are required to interface with an SDH network through STM-1 fiber optic ...

The STM-1 offers both electrical STM-1 (1+1) and optical STM-1 (1+1) interfaces. It is customized for the traffic demands, in the access network, typical of residential or business customers.

The compact size and low power consumption of R-STM-1E allow easy rack or wall installation on customer premises, in telecommunications buildings, or in outdoor cabinets.

The table below lists some parameters and the end of life power budgets for the fixed STM-1 optical interfaces that are supported by the 1643 AM and STM-1 SFP cages that are supported by the 1643 ...

As a standard and compact SDH TDM device, the STM-1 multiplexer is best ...

Valiant's STM-1(SDH) Transmission Equipment provides full capability to cross-connect at E1 level between all tributaries. The equipment can be used as Terminal Multiplexer (TM) or ...

STM-1 Optical to STM-1 Electrical converter is an interface conversion equipment supplied with one STM-1 electrical (75 Ohms BNC) interface and one STM-1 optical (MSA compliant SFP) interface.

The user removable / replaceable STM-1 Optical / Electrical interface option makes it easy to meet various and changing user requirements. Valiant's STM-1, E1 and Ethernet over SDH Transmission ...

For applications, such as video surveillance, fare collection, passenger information systems, train control, emergency voice and signalling, the TN1U is the optical communications product of choice.

8 E1 Optical Multiplexer with 100Mbps Ethernet data transmission rate solution is a high performance optical line transmission equipment, combines 8, ITU-T G.703 compliant standard electrical E1s plus ...
