

Senegal Hot-swap Power Distribution Unit IP67

Senegal power strips and PDU power distribution units for surface mount, rack mount and general purpose applications. Multiple outlet power strips are manufactured in accordance to Senegal ...

Optimize industrial power systems with hot-swap controllers that enable safe live insertion and removal of boards without disrupting operation. They manage inrush current, protect against electrical faults, ...

The compact housing with a high degree of ingress protection (IP54, IP65 and IP67) and various connector options enables the FIEPOS power supply to be installed flexibly outside of the control ...

In such applications, a complete and accurate control of the inrush current during startup/hot plug, along with overcurrent/overvoltage protections are crucial and can make the difference in terms of final cost ...

User-interactive LCD interface details current, real power, voltage, and energy measurements for local user access.

Provide all Metered or Switched PDU features, plus dual AC inputs and an Automatic Transfer Switch to provide redundant power to single-cord devices that do not have redundant power supplies.

The IP67 power supply can be mounted in any direction without being susceptible to derating. The mounting flanges on the power supply are designed to make installation quick and easy.

PDU's last for many years and with the IMD design, businesses are able to upgrade their PDU's to newer monitoring technologies in the future without having to replace the entire rPDU. The hot-swappable ...

Each Metered PDU has a digital LCD meter for real-time load monitoring. Series features include durable metal housing, horizontal/vertical mounting, switch-free design, network-grade plugs and ...

High availability for all UPSs up to 11 kVA. HotSwap MBP provides a maintenance bypass for all UPSs. UPSs can be hot swapped or upgraded without interrupting the power supply. HotSwap MBP are ...
