

Solution Cabinet Cold Aisle Armor

Our aggressively engineered approach reduces acquisition and installation costs, while providing the ultimate in effectiveness. We can custom design solutions to fit any site situation and, of course, not ...

Improve your data center's cooling and efficiency with our cold aisle containment integral roof. This solution prevents hot and cold air mixing, increasing your...

Cold Aisle Containment solutions may be what your control room needs to stay efficient and effective. They are easier to implement than other solutions and not only allow your organization ...

Like the horizontal solution, the containment is placed in one go and filled with racks after implementation. This solution comes in silver anodized color as standard, and the ground-to-roof ...

Cold aisle containment encloses the cold aisles to ensure only cold air is supplied to servers. This approach is normally used with in-row cooling and raised floors and is more common in retrofits. ...

Our aisle containment systems are vendor agnostic, featuring innovative, transparent panels that are lightweight and easily attached horizontally or vertically to cabinets using a universal rail system. ...

The Cold Aisle Containment System is a passive cooling solution which can be easily applied to improve the efficiency or expand the capacity of a data center with minimal incremental cost.

A highly engineered data center cabinet solution that delivers fast, built-to-order configurability, best-in-class strength, and scalability regardless of the application.

Find out how to improve your data center infrastructure efficiency, using the cold aisle containment or hot aisle containment solutions from Vertiv.

It is compatible with Olabs' standard 37U, 42U and 45U cabinets and is able to flexibly accommodate to other coherent solutions. With customizable accessories, it can easily retrofit almost any existing ...
