

Tonga Bridge Construction

Heavy machinery, marine equipment and construction crews have been mobilised at the Fanga'uta Lagoon site, marking the start of on-site works for Tonga's long-awaited new bridge.

The 720-metre-long bridge, currently under construction across the Fanga'uta Lagoon, will provide a vital connection between Nuku'alofa and Tonga's main island of Tongatapu.

The proposed project will build a bridge across the Fanga'uta Lagoon in Nuku'alofa, the capital of the Kingdom of Tonga (Tonga). The crossing will consist of an approximately 720 m long ...

For Tonga, the signing is not just the beginning of construction but the end of a long chapter of uncertainty. The lagoon bridge has become a symbol of both the challenges and ...

Turning complex ground conditions into a reliable connection: Fugro supported the construction of Tonga's new Fanga'uta Lagoon Bridge using O-Cell® pile testing to validate foundation designs ...

After more than a decade of planning and preparation, the construction of this vital bridge -- which will connect Folaha village to "Umusii in Ma'ufanga across the Fanga'uta Lagoon -- is finally set to begin.

A USD \$80 million grant to finance transformational infrastructure upgrades on Tongatapu including the construction of the Fanga'uta Lagoon Bridge, has been approved by the ...

The project will involve building a new 720-metre-long bridge across the Fanga'uta lagoon, to connect Nuku'alofa with the southeastern side of Tongatapu, Tonga's main island. When completed, the ...

The planned infrastructure includes a 720-metre two-lane bridge, plus access roads and drainage and lighting works, funded by the Asian Development Bank and the World Bank.

The project involves constructing a 720-metre bridge across Fanga'uta Lagoon and 2.1 km of approach roads featuring climate-resilient design. The three-year works, expected to break ...
